SUMMARY

Software engineer at JPMorgan Chase since 2023, building and modernizing Java 21 and Spring backend services for Apple Card Promotional Services and owning AWS infrastructure automation and observability (Terraform, Kubernetes, Splunk, Dynatrace, CloudWatch, Datadog) for production systems in a regulated environment. Ships full-stack side projects end to end.

TECHNICAL SKILLS

Languages	Java 21, TypeScript, SQL, Solidity
Cloud & Infra	AWS, Terraform, Kubernetes, Docker, CI/CD, GitHub Actions, Git
Observability	Splunk, Dynatrace, CloudWatch, Datadog
Frameworks	Spring, Node.js, React, Next.js
Data & APIs	REST APIs, PostgreSQL, MongoDB
Practices	Unit and integration testing, code review, Agile delivery, infrastructure as code, system modernization
Web3	Solidity, Foundry, ERC-721, Base

PROFESSIONAL EXPERIENCE

JPMorgan Chase & Co. March 2023 – Present

Software Engineer III 2025 – Present

- Own AWS management for 15 services across 8 environments, including batch applications and Lambda functions: account and infrastructure automation in Terraform, services deployed on Kubernetes.
- Build observability for production services in Splunk, Dynatrace, CloudWatch and Datadog: metrics, logging and alerting.
- Deliver Apple Card Promotional Services to production: reliability, security requirements and release readiness in a regulated environment.

Software Engineer II March 2023 – 2025

- Developed and modernized Java 21 and Spring backend services for Apple Card Promotional Services, supporting large-scale financial products.
- Moved legacy services toward cloud-native architecture on AWS as part of the platform modernization program.
- Built full-stack features in TypeScript, Node.js and React.

Earlier career 2017 – 2023

- Assistant Lab Manager, Heavy Seas Beer (Aug 2020 – Mar 2023): built Raspberry Pi integrations connecting lab instruments to data collection and analysis programs, replacing manual entry and improving traceability of production metrics.
- Winemaking and distilling roles at PA Renaissance Faire and District Winery (2017 – 2022): production from fermentation through packaging and release, with quality control.

PROJECTS

Meridian:	Online board game, authoritative server. React Three Fiber, Colyseus · brandons.sh/projects/meridian
Steward:	Discord bot that runs game nights. discord.js, Drizzle, Postgres · brandons.sh/projects/steward
CellarKeep:	Production tracker for wine, mead and cider. Next.js, Drizzle, Postgres · brandons.sh/projects/cellarkeep
StagePass:	Ticketing with web3 under the hood. Next.js, Solidity, Foundry · brandons.sh/projects/stagepass

EDUCATION

B.S. Biology · Kutztown University

CERTIFICATIONS

AWS Certified Cloud Practitioner

Certificate in Web Development · Codecademy
