

Brandon Joshua Smith

Software Engineer III · Philadelphia, PA · Open to roles in Philadelphia, NYC, New Jersey and Delaware

BrandonJoshuaPHL@gmail.com · 610-401-6372 · brandons.sh · github.com/Ayosage · LinkedIn

SUMMARY

Software Engineer III building and modernizing production systems in regulated enterprise environments. Strong background in Java, Spring, TypeScript, React and AWS, with hands-on ownership across backend services, cloud infrastructure and CI/CD pipelines. Translates complex requirements into reliable, maintainable systems, and ships full-stack and web3 side projects end to end.

TECHNICAL SKILLS

Languages	Java, TypeScript, Go, SQL, Solidity
Frameworks	Spring, Node.js, React, Next.js, Tailwind, React Three Fiber
Cloud & Infra	AWS, Terraform, Kubernetes, Docker, CI/CD (GitHub Actions), Vercel, Fly.io
Data & Integration	REST APIs, PostgreSQL, MongoDB, Drizzle ORM
Web3	Solidity, Foundry, ERC-721, Base
Practices	Distributed systems, cloud architecture, testing, agile delivery, modernization, R&D, quality control

PROFESSIONAL EXPERIENCE

Software Engineer III · JPMorgan Chase & Co. 2025 – Present

- Own AWS management and observability development for the platform: account and infrastructure automation, metrics, logging and alerting for production services.
- Continue the Apple Card integration work: system reliability, security requirements and production readiness in a regulated environment.
- Platform modernization initiative moving legacy systems toward cloud-native architecture: AWS infrastructure with Terraform, services deployed on Kubernetes.

Software Engineer II · JPMorgan Chase & Co. March 2023 – 2025

- Developed and modernized Spring-based backend services supporting large-scale financial products.
- Apple Card integration work alongside AWS management and observability tooling; full-stack features in TypeScript, Node.js and React.

Assistant Winemaker · District Winery August 2022 – November 2022

- Supported high-volume wine production: fermentation monitoring, blending, filtration, bottling and quality control.

Assistant Lab Manager · Heavy Seas Beer August 2020 – March 2023

- Managed laboratory quality systems and designed Raspberry Pi integrations connecting lab instruments to data collection and analysis programs.
- Automated workflows and improved traceability, consistency and production metric analysis.

Assistant Winemaker & Distiller · PA Renaissance Faire February 2017 – August 2020

- Managed projects from concept through fermentation, distillation, packaging and release, balancing creative experimentation with disciplined production and quality control.

PROJECTS

Meridian	Online board game, server-authoritative engine. React Three Fiber, Colyseus · brandons.sh/projects/meridian
Steward	Discord bot that runs game nights. discord.js, Drizzle, Postgres · brandons.sh/projects/steward
CellarKeep	Production tracker for wine, mead and cider. Next.js, Drizzle, Postgres · brandons.sh/projects/cellarkeep
StagePass	Ticketing with web3 under the hood. Next.js, Solidity, Foundry · brandons.sh/projects/stagepass

EDUCATION & CERTIFICATIONS

B.S. Biology · Kutztown University

Certificate in Web Development · Codecademy

AWS Certified Cloud Practitioner

Diploma in Mixology · Professional Bartending School
